

Product Procurement Catalog

Updated 5.3.24

Brand	Function
ABBYY	ABBYY software empowers organizations to understand business processes and the content that fuels them with its Digital Intelligence platform.
Acronis	Acronis software supplies innovative backup, anti-ransomware, disaster recovery, storage, and enterprise file sync and share solutions.
ActivNav	ActiveNav is a data privacy and governance software company.
An OpenText Company	OpenText is a world leader in Information Management solutions, helping companies capture, govern and exchange information on a global scale
Arcserve	Arcserve is a provider of data protection, replication, and recovery software.
Beyond Identity	Beyond Identity provides passwordless identity management software to help secure digital business
Bitdefender	Bitdefender develops threat prevention, detection, and response software
Bluebeam Software	Bluebeam Revu supplies markup and collaboration technology that saves design and construction teams time and money.
Canonical	Canonical publishes Ubuntu, provides commercial services and solutions for Ubuntu
Carbonite + Webroot.	Carbonite SaaS supplies a Data Protection Platform for businesses, including backup, disaster recovery, high availability, and workload migration technology.
Cato Networks	Cato is a SaaS-based zero trust remote access solution
CHEF	Chef is a configuration management software that automates infrastructure provisioning
Cloudian	Cloudian supplies data management software for the hybrid cloud
Corel	Corel develops software programs used for editing vector graphics, illustration and design
CoreView	CoreView SaaS is a cloud management tool that delivers advanced Microsoft Office 365® management
CyberRes	CyberRes is a SaaS-based zero trust remote access solution
Cyrebri	Cyrebri is a SaaS-based centralized interactive SOC Platform that integrates all your security events with strategic monitoring, threat intelligence and IR

DataCore	DataCore Software develops software-defined storage solutions
Datadobi	Datadobi StorageMAP and DobiMigrate SaaS manages heterogeneous unstructured storage and hybrid-cloud environments
Delinea	Delinea is a SaaS-based privileged access management solution
Eclypsium	Eclypsium protects devices and supply chains by identifying, verifying, and fortifying firmware code throughout the enterprise.
ExtraHop	ExtraHop SaaS supplies cloud-native network detection and response for hybrid enterprises
Fivecast	Fivecast provides digital intelligence software
Flexera Software	Flexera Software provides application usage management solutions
Freshworks	Freshworks is a cloud-based software suite that streamlines customer conversations across multiple channels
Garland Technologies	Garland Technology provides industry leading test access points (TAPs), inline bypass TAPs, network packet brokers (NPB), and Cloud visibility solutions
GFI Software	GFI Software develops network management and performance, security, and collaboration applications
Grafana	Grafana is a multi-platform open source analytics and interactive visualization web application
Hammerspace	Hammerspace is a software-defined data orchestration and storage solution
Harris Computer Corp	Harris provides mission critical software solutions for the Public Sector, Healthcare, Utilities and Private Sector verticals
HCL	HCL software for digital transformation, data, analytics and insights, AI and automation and enterprise security
Hitachi	Hitachi develops a host of enterprise software solutions
IBM	IBM develops a host of enterprise software solutions
Illumio	Illumio provides visibility, segmentation, and control of all network communications across any data center or cloud
Imperva	Imperva supplies security solutions that protect the information in the cloud and on- premise
Intel Software	Intel software tools and libraries to deliver optimization and differentiation across open software ecosystems
Intellective	Intellective integrates enterprise content services and business process management through its Unity platform
Invicti Security	Invicti enables organizations to scan and secure web applications and APIs continuously
Ironscales	Ironscales solution is an email security platform

JetBrains	JetBrains specializes in intelligent, productivity-enabling software tools
Liquid	Liquid's software disaggregates the server components in the datacenter and places them into resource pools
LogicGate	LogicGate's governance, risk, and compliance software enables businesses to build agile GRC management processes at scale
LogRhythm	LogRhythm SIEM software helps organizations measurably reduce risk by rapidly detecting, responding to, and neutralizing cyber threats
Lyve	Lyve is an edge-to-cloud mass storage platform
Macrium Software	Macrium Reflect provides comprehensive backup and DR solutions to protect valuable data and operating systems
Mendix	Mendix is the fastest & easiest low-code platform used by businesses to develop mobile & web apps at scale
Micro Focus	Micro Focus is one of the world's largest enterprise software providers
Minitab	Minitab develops powerful statistical software
Mirantis	Mirantis software helps organizations ship code faster on public and private clouds
MixMode	MixMode is a purpose-built self-learning AI that can detect threats and anomalies across any data stream, and at any scal
N-able	N-able software offers a full-featured tech stack with integrated monitoring, management, security, and ticketing
Nitro	Nitro software is used to create, edit, sign, and secure Portable Document Format (PDF) files and digital documents
NoName Security	Noname Security helps enterprises deploy APIs at the speed of business with the most powerful, complete, and easy-to-use API Security Platform
Paessler AG	Paessler AG's software is a network monitoring tool that helps ensure that computer systems are running smoothly and that no outages occur
PagerDuty	PagerDuty is an American cloud computing company specializing in a SaaS incident response platform for IT departments
Parallels	Parallels software helps businesses and individuals to access and use the applications and files they need on any device or operating system
Proofpoint	ProofPoint provides a cloud-based suite of people-centric compliance and security solutions that mitigate the most critical security and compliance risks
Puppet	Puppet is a software configuration management tool which includes its own declarative language to describe system configuration
Red Hat	Red Hat supplies open-source software

Salt Security	Salt API Protection Platform discovers all APIs and their exposed data, stops attackers in their tracks, and provides remediation insights
Scale Computing	Scale Computing provides edge, virtualization, and hyper-converged computing
Seagate Technology	Seagate creates precision-engineered data storage technologies that deliver superior capacity, speed, safety, and performance
Seceon Inc	Seceon aiSIEM, combined with aiXDR, is a comprehensive cybersecurity management platform that visualizes, detects ransomware detection, and eliminates threats
Security Scorecard	Security Scorecard software provides risk ratings that automatically map to vendor cybersecurity questionnaire responses, providing an accurate 360-degree view of risk
Sliceup	SliceUp software uses predictive analytics to detect long tail network problems and their root causes
SmartBear Software	SmartBear software streamlines DevSecOps processes
Snorkel	Snorkel software uses novel, theoretically-grounded unsupervised modeling techniques to automatically clean and integrate them
Solarwinds	SolarWinds provides powerful and affordable IT management software
Solo.io	Solo.io simplifies how to secure and scale cloud-native applications, using the industries' leading application networking platform
Sonatype	Sonatype's Nexus platform combines component intelligence with real-time remediation guidance to automate and scale open-source governance across every stage of the modern DevOps pipeline.
Sophos	Sophos Central platform is an adaptive cybersecurity ecosystem that makes open APIs available to customers, partners, developers, and other cybersecurity vendors
SUSE	SUSE is a German-based multinational open-source software company that develops and sells Linux products to business customers
Synack	Synack software is used to discover, assess, remediate and verify vulnerability patches
Synopsys	Synopsys is a leading provider of electronic design automation software
Team Cymru	Team Cymru's Pure Signal platform is for on-demand visibility into what is happening virtually anywhere across the Internet with clarity like its own internal network telemetry

TeamViewer	TeamViewer provides a connectivity platform to remotely access, control, manage, monitor, and repair devices
TechSmith	TechSmith provides screen capture and screen recording software
Telerik	Telerik software provides all the building blocks to maximize productivity and build richer, slicker and better-performing applications with ease
Tintri	Tintri provides products designed for businesses cloud computing, virtual machines, and containers
Tovuti LMS	Tovuti LMS is an adaptive, people-first learning SaaS platform
Trend Micro	Trend Micro's entire focus inspired innovations that keep up with the bad guys despite a changing IT landscape, riskier user behavior, and constantly evolving threats
Unitrends	Unitrends uses high-availability hardware and software engineering, cloud economics, enterprise power with consumer-grade design, and customer-obsessed support to provide all-in-one enterprise backup and continuity natively
Viking Enterprise Solutions	Viking Enterprise Solutions designs, manufactures, and sells leading-edge off-the-shelf and customized server and storage platforms for data centers and enterprise markets
VIPRE	VIPRE develops cybersecurity products focused on endpoint and email security along with advanced threat intelligence applications
Vulcan Cyber	Vulcan Cyber is a cybersecurity company that helps enterprises detect and fix vulnerabilities in their software stack and code
Wasabi	Wasabi hot cloud storage supplies fast to write, low-cost, and reliable cloud storage
Xage Security	Xage provides the first and only blockchain-protected security platform for the Industrial Internet of Things (IIOT)
Zendesk	Zendesk's SaaS customer service and engagement solutions are powerful and flexible and scale to meet the needs of any business
ZeroFox	ZeroFox provides cloud-based software as a service (SaaS) for organizations to expose and disrupt phishing and fraud campaigns, botnet exposures, credential theft, impersonations, data breaches, and physical threats that target your brands, domains, people, and assets
