

DOD ESI BPA

YOUR PREFERRED SOURCE FOR IT ACQUISITION ACROSS THE DOD

DoD ESI is a joint project originally established as the Department of Defense Enterprise Software Initiative to implement a software management process for the DoD enterprise. Starting with twenty-three best practices for software purchasing and management identified and adopted by the DoD ESI Working Group, DoD ESI created and implemented a DoD-wide process for acquiring commercial software. Information Technology (IT) acquisition and contracting professionals within participating DoD Services and Agencies, known as Software Product Managers (SPMs), negotiate DoD ESI enterprise agreements and support contracting actions. DoD ESI leads efforts to implement enterprise IT Asset Management (ITAM) capabilities across the Department. DoD ESI is represented on the DoD Strategic Sourcing Board of Directors (SSDB) and on the Federal Strategic Sourcing Initiative (FSSI) IT Commodity Team. DoD ESI implements General Services Administration (GSA) Software Purchase Agreements, formerly SmartBuy, within the DoD and Federal Government.

WHY IS DOD ESI THE PREFERRED CONTRACT VEHICLE ACROSS THE ENTIRE DOD?

By leveraging DoD-wide requirements for commercial software and presenting a single negotiating position to software providers, SPMs implement enterprise purchasing vehicles with pricing advantages, contract terms, and licensing provisions not otherwise available to individual DoD Components and other authorized buyers, including the Intelligence Community. DoD ESI also offers vehicles for selected IT services and facilitates commodity IT hardware buying initiatives.

ABOUT EMERGENT

Emergent is an award-winning IT solutions provider and value-added reseller based in Virginia Beach, VA. Since 2006, Emergent has specialized in solving complex challenges and delivering best-in-class technology solutions to various operations worldwide. Emergent partners with some of the most prominent and industry-leading technology platforms to deliver lifecycle IT services across cloud computing, open-source, and creative solutions. DoD ESI is the preferred contract vehicle to procure Red Hat Solutions across the Department of Defense.
